

1 Introduction

Mental models guide us in navigating reality and understanding our existence. This document presents a framework based on geometric patterns and symbolic representations that form the foundation of our perception and interaction with the world.

2 Mental Models and Geometric Foundations

The triangle and sphere represent the strongest forms according to reality. There are eight triangles in a sphere, and when we stack four triangles, we observe a triform pattern. This configuration reveals that the middle triangle is empty (representing FORCE), while five triangles below form the foundation of a WHOLE (HOLY) Sphere comprising:

- ION - self in space (force)
- KNOWN - 3x triangles (community, service, justice – as defined by our constitution; represented in Zelda games)
- UN - 5x triangles; understanding these is essential for success

3 The Three Spheres

- ION
- MIND
- PLANET (PLAN IT) - Perhaps Earth Was Planned

Understanding the interactions within these three spheres, combined with our triangle model (similar to the one on the dollar bill), helps guide our thoughts. The pyramid represents teamwork, and the currency is MOVEMENT (what gives money power).

Movement can be upward or downward together. DEAMONS MOAN from below—the UN. We know pain first, so we move away from it. The UN KNOWN (we wonder or W UN DER). Our understanding may cause us to move toward it again.

4 Energy and Directional Framework

The epoch is our shared understanding of reality. We know:

- LOVE - LIGHT
- HATE - DARK

This yields a directional framework with three modes:

- PARK: Why
- FORWARD: Love moves into Dark to Understand Hate thus Yielding Light and Love
- REVERSE: Love moves into the Light to Understand Hate thus Yielding Hate and Dark

Energy is a transformer; it moves. We can add Energy to LOVE or add Energy to HATE. The question becomes HOW and WHY? COMPENSATION will drive us at the IDEA layer—this is a feeling (not money/work or time/strategy).

5 Energy and Directional Framework

The epoch is our shared understanding of reality. We know:

- LOVE - LIGHT
- HATE - DARK

This yields a directional framework with three modes:

- PARK: Why
- FORWARD: Love moves into Dark to Understand Hate thus Yielding Light and Love
- REVERSE: Love moves into the Light to Understand Hate thus Yielding Hate and Dark

Energy is a transformer; it moves. We can add Energy to LOVE or add Energy to HATE. The question becomes HOW and WHY? COMPENSATION will drive us at the IDEA layer—this is a feeling (not money/work or time/strategy).

6 The Pyramid Model

Figure 1: The Pyramid Model: 5 UN + 3 KNOWN + 1 MIND = Complete Structure

In the pyramid model, the five triangles at the bottom (UN) represent the foundation, the three middle triangles (KNOWN) represent community, service, and justice, and the single top triangle represents the MIND. Your Mind is the strongest at the top and it knows the three triangles in the middle. You must trust the middle triangles to truly understand the UN. When the mind's eye understands the five unknown triangles, this is called EPIPHANY or feeling.

7 The Five Triangles and Their Significance

- FIVE triangles
- FIVE feelings
- FIVE domains of warfare (sea, land, air, space, cyber/soul)
- FIVE fingers

Pain is the opposite of understanding: DE SIRE. Just as the gym makes you strong over time; the mind must be exercised over time as well or you will learn to K NOW pain/desire.

One might speculate that when you die, those little IONS in your mind will simply slow down, forever. As those little IONS slow down, your reality will never die. The ION lives in the Soul/Space just as you live on this Earth and experience it through your Mind's eye (past ion, present self, future earth). Your mind will see the IONS forever and you will FEEL them forever. The earth is made through our collective realities.

8 Conclusion: Towards a Unified Model

We now have the makings for any religion or reality, for we have a model for the soul; rapidly moving from the qualitative to the quantitative and back again; this is thought. Qualities reside in the five triangles and are interpreted through our ability to quantify the qualities through the three triangles of measurement.

When you have lived a "good" life then the feeling will be so when you die and it is what "you" become. Our ions can go backwards in "time". We experience these things as reality. The combined feeling that we all agree on is the same... love, hate and degrees to each. The degree must be a measure of understanding versus desire. Your Degree may or may not be the Triangle that you enjoy... but it's where you are, friend; don't be afraid to wonder.
